Dear reader,
I am excited to apply for this job opportunity, I am motivated to improve myself and my work to shape projects to the best of my ability. I am currently in my third year a Beng degree at UEA in computer systems engineering. I have completed programming, electronics, network and embedded systems modules in my studies.

During my time at university i have become more and more interested at low level software and hardware development, everything from designing chips to writing code to run on it. I have made a logic based traffic light system, an analogue mircophone encoder and amplifier as well as a knock off "BopIt" game for various couseworks, as well as severl software projects in my free time to further my learning.

I look forward to hearing back from you and taking the next step in my career. please find above my contact and project infomation.

Many thanks
Toby Towler
